AIR – ARTIST IN RESIDENCE Niederösterreich, 01.06 – 30.06. 2023

The Residence AIR Niederösterreich / Kunstmeile Krems was an incredible opportunity for me to find inspiration and discover new creative ideas in a different environment.

During the residency, I had the opportunity to fully focus on my work, met other artists and made valuable connections with other artists and art professionals.

I discovered the local and international art scene /visiting museums, galleries and spaces for art projects/.

I made personal and cultural discoveries that led me to new conceptual and practical ideas for my current and future works. I was also able to create new works inspired by the space and the surrounding area. I can say that all my discoveries here, made through research, experimentations and observation, have contributed to the advancement of my artistic practice.

The facilities, resources and support I received from the residence were exceptional.

I would be happy if the residency have some sort of continuation in the form of participation in future projects or possible exhibitions that could contribute to the realization of my work as an artist.
